

MARK E RESEARCH!

**Doing numbers on my PC I the funniest thing for me.
Why it is so simple – even I can do it – as you can see.
Even Larry Smith can turn it on and watch the numbers
flash.**

**However, when the numbers start to fade – my sweet PC
goes into
a crash!**

**But never fear – Nina is here to implore this computer to
move.**

**Then I tell Nina, this computer needs love, – I think I can
make it groove.**

**I get close beside it and talk to the disks, the interface, and
the joystick too!**

**Finally the PC is crunching along while I go look for a
corkscrew.**

**But doing these numbers for the daily reports is really a
cosmic start of mind.**

**You see I meditate on life, Zen, and the Tao, and in between
vintage wine.**

**Then I ring my astrologer to verify the position of the stars.
She tells me it is okay to move – like for real – as it is
written in the tarot cards.**

**So to Mark E Research we bid you a warm and fond Farwell.
Your analytical skill at numbers is unique, dynamic and
real swell.**

**We won't soon forget the sex, drugs, rock n' roll or
especially good old you.**

**So from all your friends and numbers – it has been like
really – really cool!**
